Activate Azure
with Enterprise-grade Networking

Proof of Concept

Duration: 3 Days | **Focus Area:** Upgrade, Migration, and Deployment | **Difficulty**: Level 300

This offering aims to get participants proficient in Azure technologies to develop readiness in implementing enterprise-grade networking scenarios. The service covers a wide spectrum of Azure Networking, starting with Virtual Network essentials, traffic filtering, load balancing, traffic routing, Virtual Networking interconnectivity scenarios, and PaaS service network security features.

◆ OUTCOMES ◆

Activate Azure jump-starts your development team with necessary skills and knowledge to build and deploy scalable cloud-native apps leveraging the latest Azure services.

01
GET READY

Gain a deeper understanding of Azure Networking essential capabilities to implement enterprise-grade network deployments

02
LEARN BY EXAMPLE

Gain understanding of Azure Networking features, from Virtual Network definition to traffic routing, filtering and load balancing

03
BUILD & DEPLOY

Apply gained Azure Networking knowledge to deploy secure infrastructural workloads spanning IaaS and PaaS service footprint

◆ CAPABILITIES ◆

Build an end-to-end proof-of-concept app that can be used as a reference architecture for developing custom apps for your business.

OUR EXPERTISE

Our trainers are all certified Azure engineers with real world experience to guide your networking team to quickly design and deploy to Azure Cloud.

PROVEN CURRICULUM

Our curriculum is industry proven to accelerate the learning curve of most networking teams working on Azure deployments
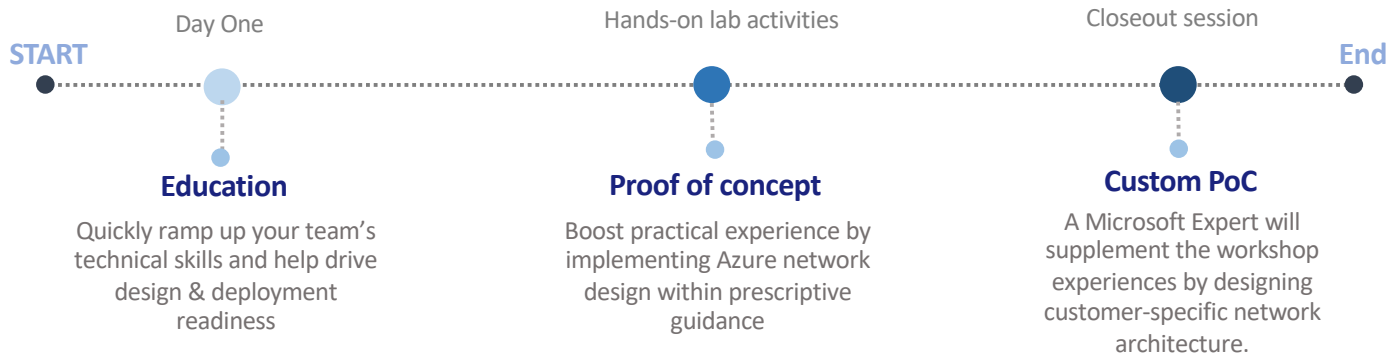

BEST PRACTICES

Use proven design patterns, tools, and guidance to secure your cloud deployments.

Microsoft

Duration: 3 days

START	Day One	Hands-on lab activities	Closeout session	End

Education

Quickly ramp up your team's technical skills and help drive design & deployment readiness

Proof of concept

Boost practical experience by implementing Azure network design within prescriptive guidance

Custom PoC

A Microsoft Expert will supplement the workshop experiences by designing customer-specific network architecture.

CUSTOMER SATISFACTION

AVAILABLE WORLDWIDE

The offering prerequisites for the target audience include:

- Solid knowledge of internetworking
- Prior experience designing network solutions
- Familiarity with enterprise-grade networking scenarios
- Basic understanding of Azure Portal and Services

- Virtual Networks and subnets
- Network Security Groups
- Application Security Groups
- NSG Service Tags
- Azure Load Balancer
- Azure Traffic Manager
- Azure DNS

The offering agenda includes coverage of major Azure Networking features including:
